Meeting Adjourned at 0820 by Dr. Schmidt

Standard Language

- **Event with OFI**

- **Determination:** The TMD and members of the committee deemed this case as event with identified opportunity for improvement. OFI =... The committee agreed that care was acceptable with reservation.
- **Action:** Education in the form of case review was provided to committee members within the Peer meeting. The filter is closed. The issue will continue to be tracked and trended via the Trauma Dashboard for opportunities to protect and benefit future trauma patients to mitigate or prevent similar or future events.
- **Determination:** The TMD and members of the committee agreed that care was not acceptable.
- **Action:** The issue is currently being addressed for the protection and benefit of future trauma patients to mitigate or prevent similar or future events through policy update and review and improved provider communication. The filter/case will be open pending the action items.

- **Event with no OFI**
- **Determination:** The TMD and the members of the committee agreed that care was appropriate given all factors involved. There were no opportunities for improvement identified. Care was acceptable.
- **Action:** Education in the form of case review was provided to committee members within the Peer meeting. The filter is closed. The issue will continue to be tracked and trended via the Trauma Dashboard for opportunities to protect and benefit future trauma patients to mitigate or prevent similar or future events.
